2. Muhammad Ariff bin Baharuddin
3. Huzsa Syahyzal Haiqal bin Hussain
4. Hrishi Vengalsetti

Play

Problem

- **Manual event registration and attendance tracking** using Google Forms and Sheets, which are repetitive and error-prone.
- **Scattered and unstructured data** making it difficult for committees to compile attendance reports and track member participation
- **Inefficient communication** as announcements are spread across WhatsApp groups, causing members to miss updates

Statistic

Based on feedback from IEM UTM Student Section, committees spend around 3–4 hours after each event compiling attendance data and preparing reports.

Our Solution - IEM Connect

- IEM Connect is a centralized web-based platform designed to simplify and automate the entire event management process for IEM UTM Student Section.
- The system allows committees to create events, manage registrations, track attendance via QR code, and generate real-time reports — all in one place.
- Features:

1

Automated Event Management Module

Streamlines event creation, registration, and attendance — reducing manual workload.

2

Analytics & Reporting Dashboard

Provides real-time insights and visual summaries for better decision-making.

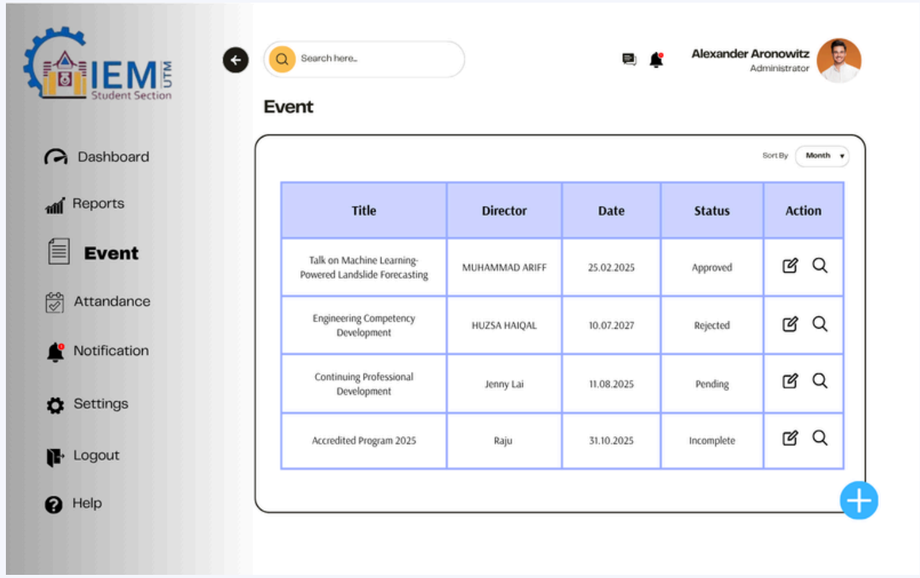
3

Centralized Information Hub with AI Chatbot

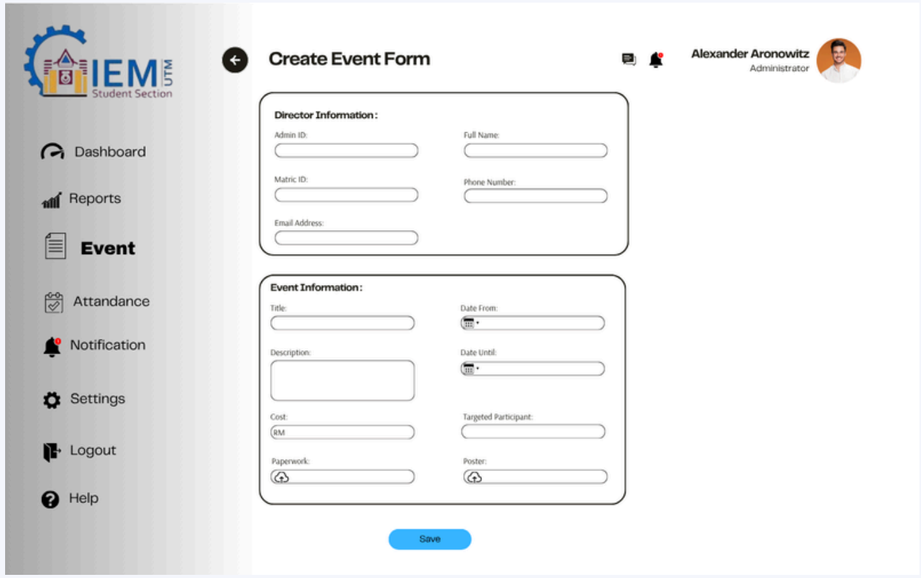
One-stop communication center where members get instant event info and updates.

Prototype Overview - Admin (Committee)

Automated Event Management Module



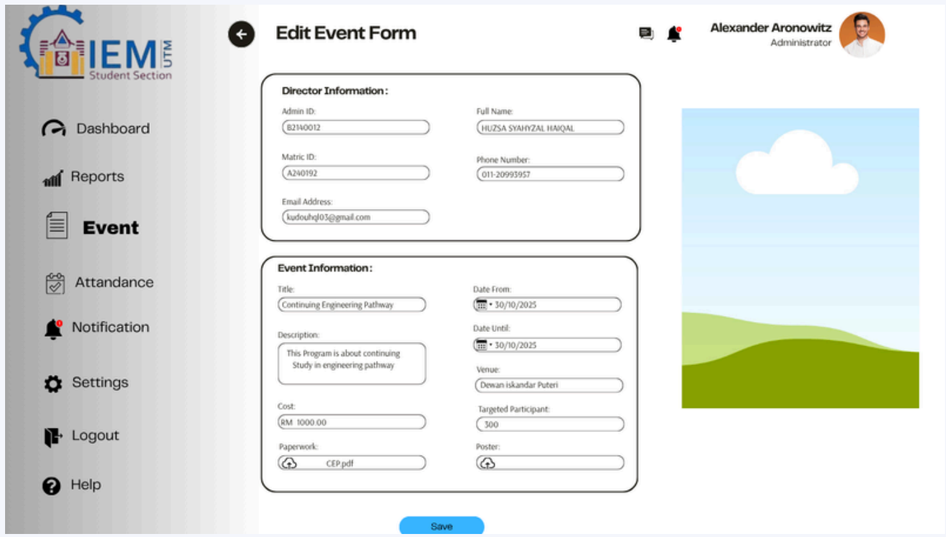
When admin clicks on Event, it will display a table containing details of registered events with view and edit features available. This page also provide search feature to search for events.



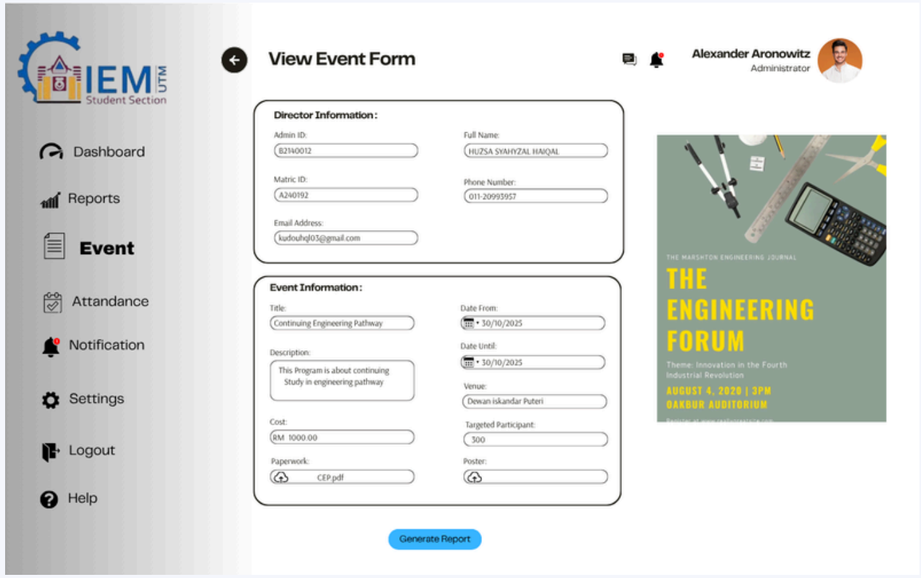
When admin clicks on add button, admin will be directed to this page and able to create a new event by filling the form provided and save it.

Prototype Overview - Admin (Committee)

Automated Event Management Module



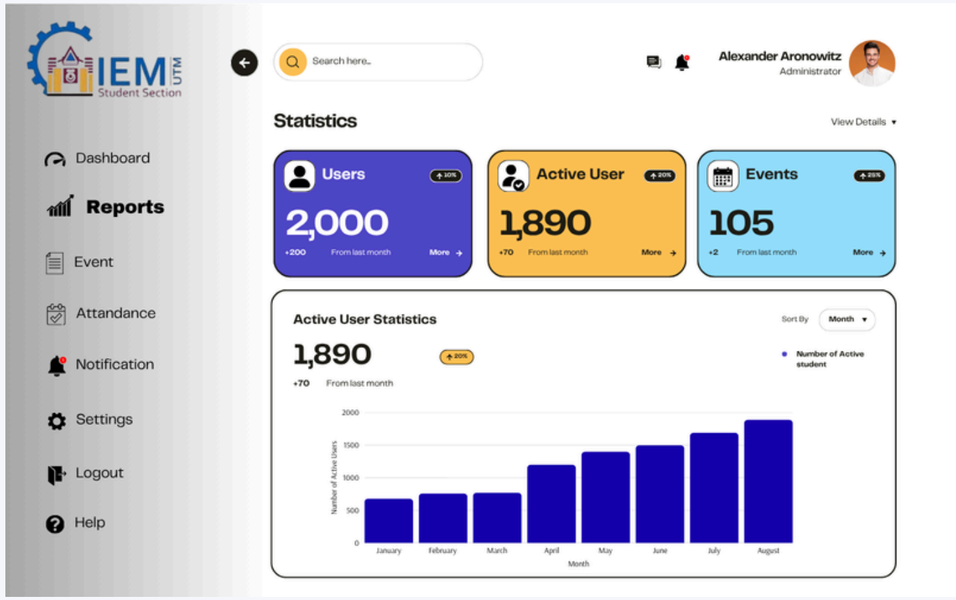
This is an edit event page, where admin can edit the data in the answer box and save it to update the data.



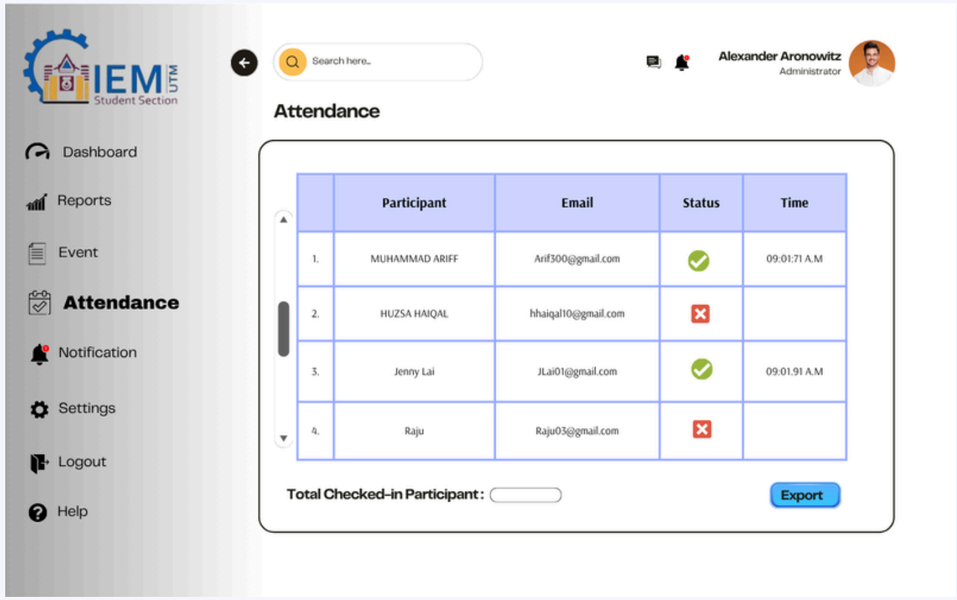
In this page, admin can view the filled form including the poster. Admin also can generate the form into pdf file.

Prototype Overview - Admin (Committee)

Analytics & Reporting Dashboard



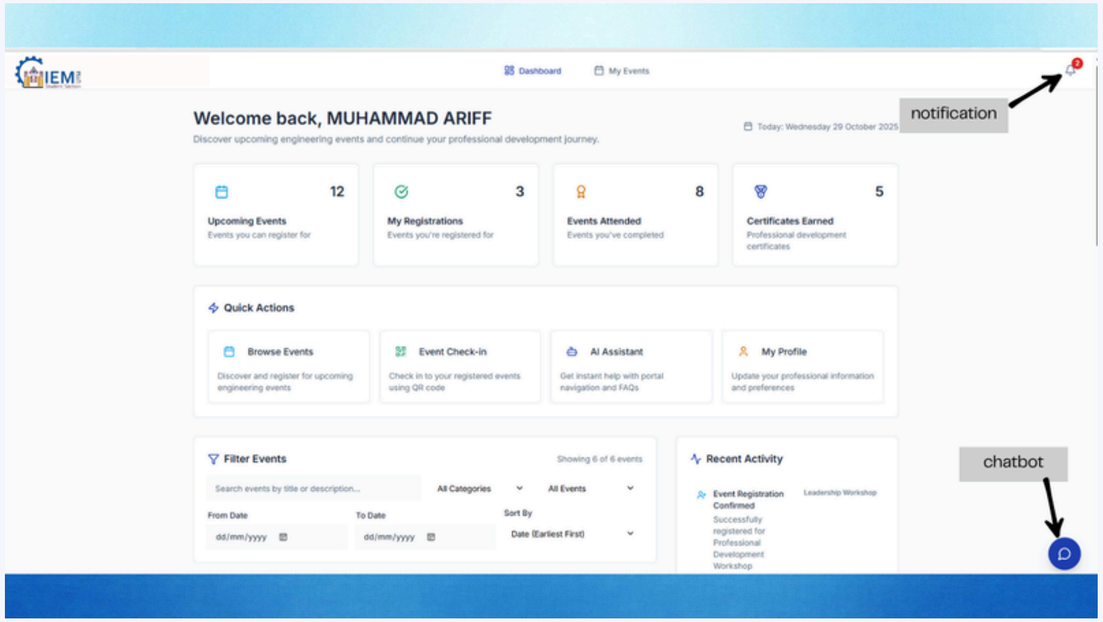
This will be reports dashboard where, admin can observe the change in number of users, active users and new events. Admin can analyze active user statistic through bar chart provided.



In this attendance page, admin can view the attendance of participants in certain event. It will record participant's name, Email, check in status and check in time.

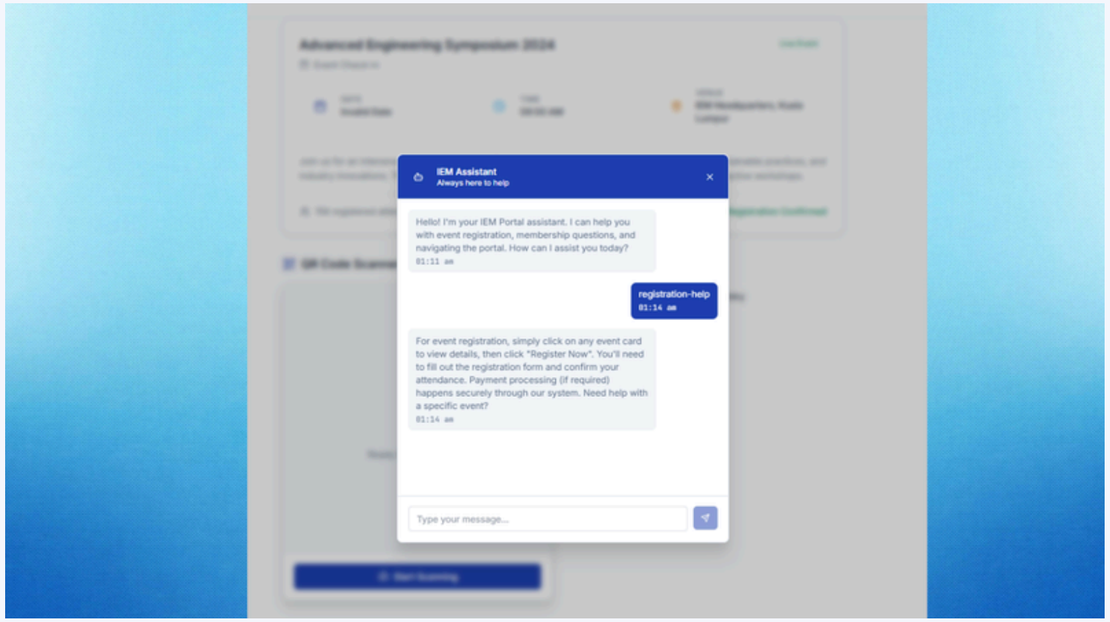
Prototype Overview - User (Student)

Automated Event Management Module



After users log in with the user id, they will be directed to the dashboard page where upcoming events, registered programs, events award, certificate earned are displayed. Users can also use chatBot for inquiries by clicking the chat icon.

Centralized Information Hub with AI Chatbot



When user click on the chatBot, they will be directed to the message box where they can inquire anything related to IEM.

Unique Value Proposition

- A one-stop web platform that automates event management, attendance tracking, and reporting for IEM UTM — saving time, reducing errors, and improving communication
- Tailored for IEM UTM Student Section workflow
- Combines automation, accuracy, and connectivity

Traction

- Collaboration confirmed with IEM UTM Student Section.
- Requirements validated through stakeholder interview with Head of Logistics & Technical Department.
- Stakeholder feedback confirms alignment with real needs
- Pilot test scheduled during the upcoming “A Date With Engineers” event in December 2025

Join Us in Transforming IEM UTM Event Management

Call to Action

- We invite IEM UTM Student Section to be our first adopter and collaborative partner in refining IEM Connect.
- Together, we aim to build a sustainable and innovative platform that streamlines event management, enhances communication, and strengthens student collaboration.
- We also welcome future partnerships or sponsorship support to further improve the system and ensure long-term maintenance.

Thank You

With IEM Connect, we're excited to empower student engineers to manage events smarter, faster, and better.
