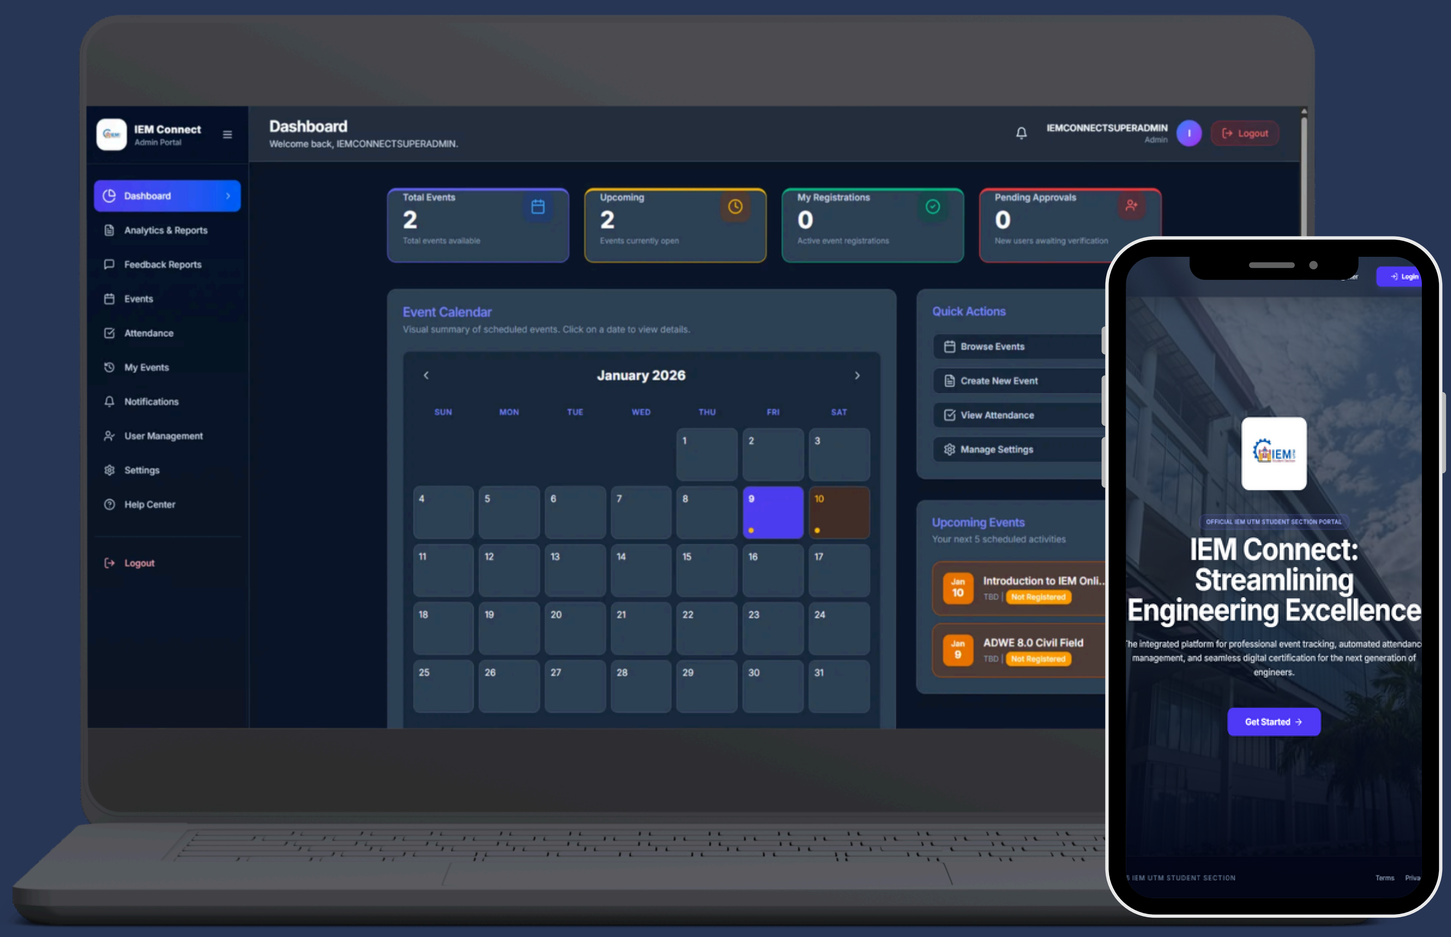
# IEM CONNECT

**Smart Events. Stronger Connections.**



## NEED

- Event information is scattered across multiple platforms, making it difficult for members to discover events
- Event registration and participation management rely on manual or inefficient processes
- Organizers lack a centralized system to manage events and track participation effectively

**IEM Connect is a web-based platform designed to centralize event management, registration, and participation tracking for the IEM UTM Student Section.**

## VISION

**To provide a centralized and intelligent digital platform that streamlines event management, registration, and communication for IEM members, enhancing efficiency, accessibility, and engagement within the IEM community.**

### AUTOMATED EVENT MANAGEMENT

- Create, edit, and manage events digitally
- Centralize event registration and attendance tracking
- Ensure events are published and visible to members in real time

### ANALYTICAL & REPORTING DASHBOARD

- View user participation and event statistics
- Export attendance and participation reports
- Support data-driven monitoring of event performance

### AI CHATBOT INFORMATION HUB

- Provide centralized IEM and event-related inquiries
- Deliver instant assistance through AI-based support
- Reduce reliance on manual inquiries to committee members
